PLCnext Store

The digital software market place for automation

PLCnext Store
www.plcnextstore.com

Welcome to the PLCnext Store

The world is in transition, digitalization is placing new demands on the automation industry. Our aim is to create opportunities from challenges.

For this reason, Phoenix Contact has created PLCnext Technology – a new, open ecosystem that provides versatile and flexible opportunities, and that responds to the continual convergence of the automation and IT worlds. The combination of an open control platform, suitable software solutions, a continually growing community, and integration into the cloud enables easy adaptation to the dynamically changing conditions.

We are convinced that only together can we succeed as an automation industry in completing the successful transition into the digital world. In order that we can better exploit existing potentials and drive innovations forward, the PLCnext Technology ecosystem has been extended with a digital market place which enables the exchange and trade of existing software solutions. With the PLCnext Store, Phoenix Contact provides the PLCnext Community with an open exchange platform for its software functions and the efficient use of existing and future software services (apps).

It is time to utilize the collective intelligence of the entire automation industry. It is time to think in new ways. It is time for the

PLCnext Store
install unexpected possibilities

A digital software market place for unlimited possibilities

The PLCnext Store provides software applications that enable you to expand the functions of a PLCnext Control device directly and easily, or that enable you to accelerate the engineering process. The open nature of the store also enables third-party providers to sell the apps that they have developed.

Benefits for the user

Realize your individual automation applications using the wide range of different apps available in the PLCnext Store. There are numerous software libraries for PLCnext Engineer as well as ready-programmed turnkey apps and function extensions for your PLCnext Control devices available for easy downloading here.

Using suitable apps from the PLCnext Store, you can reduce the amount of time needed during the engineering process, saving you laborious programming steps.

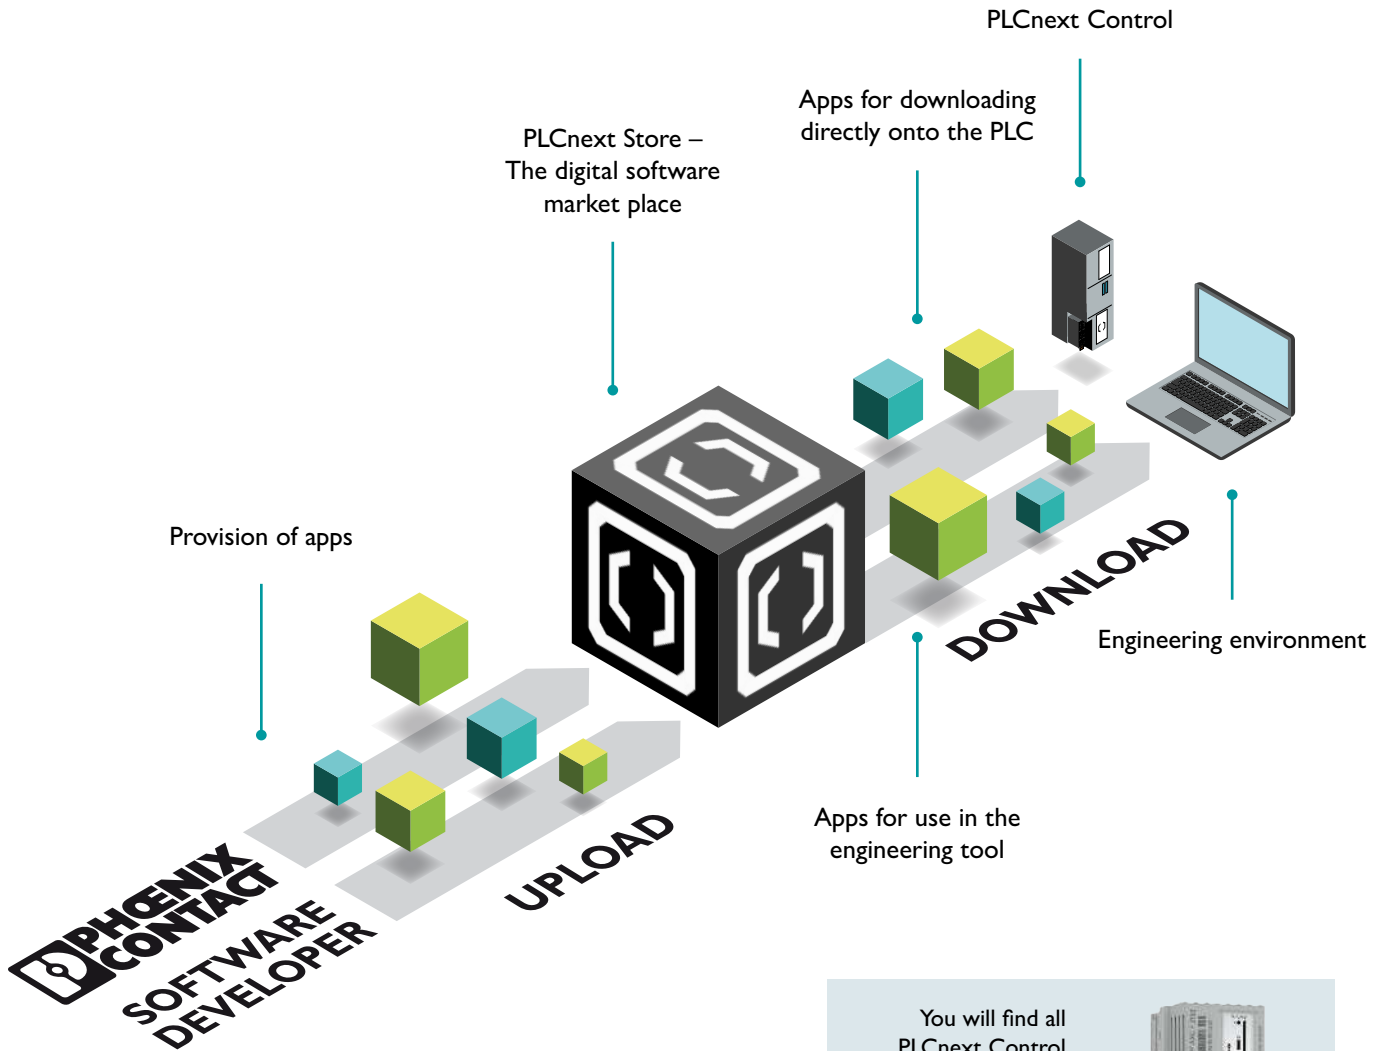

This open digital software market place features a broad and ever-increasing range of software solutions from different software providers. You can therefore draw upon the expertise of the entire PLCnext Community.

Benefits for the provider

Use the PLCnext Store as the new exchange platform and make the software solutions for a PLCnext Control device that you have developed in-house available to a broad customer base. You are able to set your own price for your developments – we will manage the licensing process and sales transaction on your behalf.

Along with the easy access to a broad and industry-specific target group, you will also be benefiting from a new, digital business model.

You will not only be improving your income – you can also take advantage of this access to increase your profile in an industrial environment that is relevant to you.

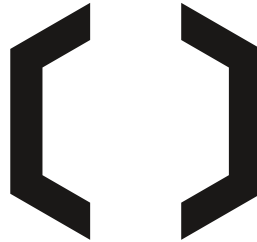

You will find all PLCnext Control devices on our website:

Learn more on our fan page and become a part of the community.

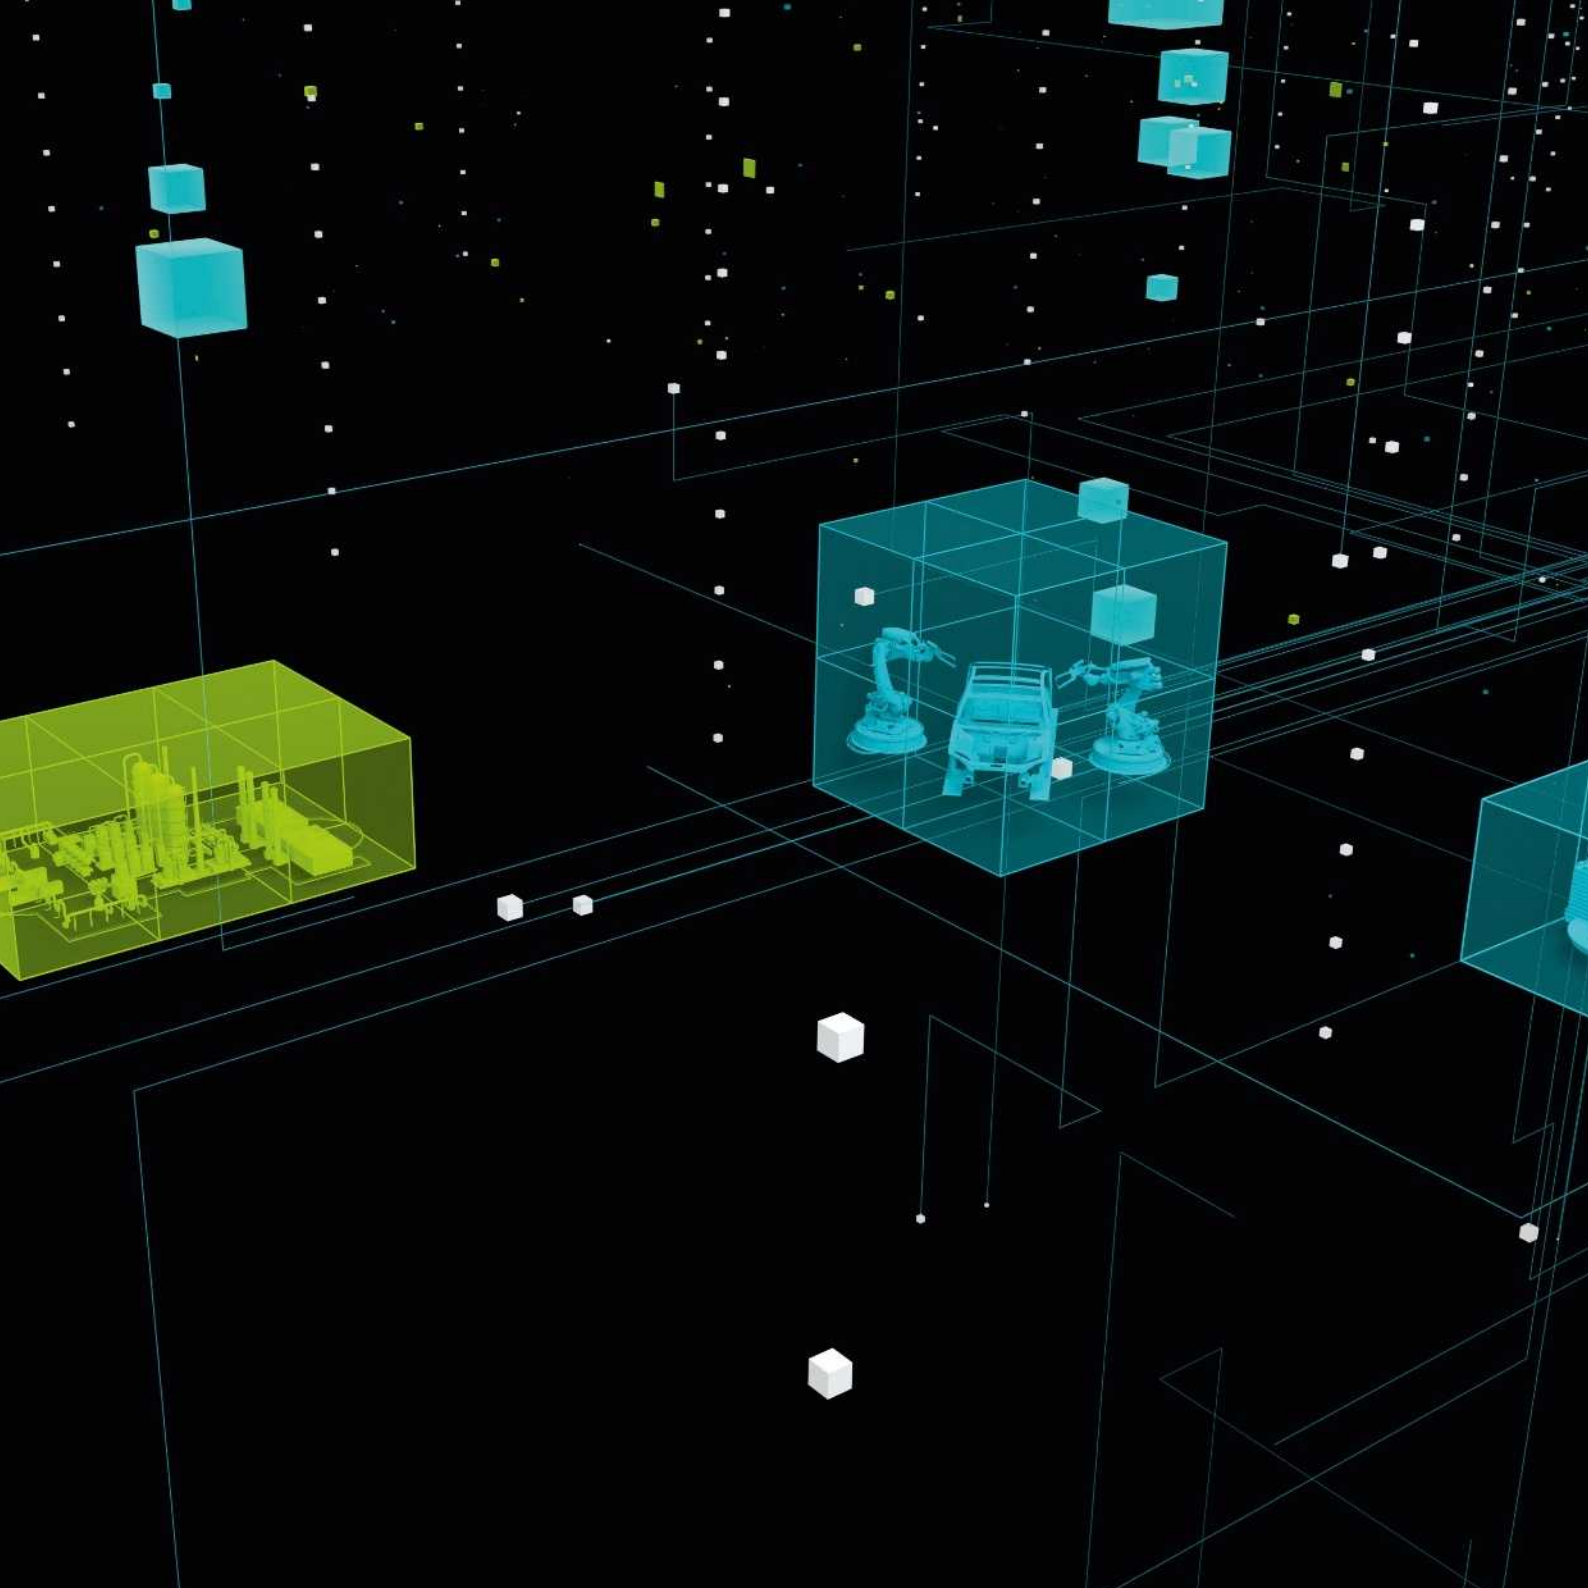

Take advantage of tutorials, open-source software, FAQs, and many other contributions on a wide range of digital platforms, such as YouTube and GitHub. You will find comprehensive information on the entire PLCnext Technology ecosystem on our fan page at
